Clean ahead

Scrubmaster B140 R

Efficient ride-on scrubber-drier

Extremely manoeuvrable – compact – easy handling

1) Pre-sweep

The efficient pre-sweep (optional) spares labourious preliminary cleaning and saves up to 40% of extra costs for additional machines. It already collects loose dirt from the dry floor before the scrub brushes set to work.

2) Turning radius 120 cm

The small turning radius makes the compactly-built Scrubmaster B140 R ideal for cleaning narrow floor spaces.

3) Optimal overview

The centralized driver's seat provides an optimal view of the floor space to be cleaned.

The cockpit can be entered from both sides. The comfort seat can be individually adjusted for convenient fatigue-free working.

4) Easy to operate

Each work process can be started simply by pushing the green Hakomatic button. All operating elements are in direct visual- and operating range of the driver.

5) Perfect base

The parabolic-shaped squeegee provides excellent cleaning results even in curves and on problem floors. The brushes and pads can be easily changed, no tools needed.

6) Battery-quickchange system

The batteries are easily accessible and can be equipped with a quick-change system (option).

7) Dosing, filling, emptying

The big flex-tank has a capacity of 140 litres. The drain hoses equipped with a built-in dosage system allow fast emptying. The Hako-Aquastop®-System saves up to 50% of water and cleaning agents.

Powerful basic- and maintenance cleaning: Scrubmaster B140 R covers up to 5,300 m²/h

Scrubmaster B140 R

Scrubmaster B140 R
with optional pre-sweep

Technical specifications Scrubmaster		B140
Working width	cm	88
Squeegee width	cm	110/95"
Coverage approx.	m ² /h	5,300
Nominal voltage	V	24
Number of brushes		2
Working speed	km/h	6.0
Fresh water tank flex-tank	l	140
Recovery tank flex-tank	l	140
Width without/ with squeegee	cm	93/110 (95")
Weight without battery	kg	365
Weight (wet) with battery	kg	760
Overall performance	kW	3.0

Configuration, colour and design are subject to change without notice in favour of new technical developments. Images may show optional extras.

Individual programming

The Hako-Control-System enables us to program the machine to meet your individual requirements, for example, an automatic brush- and water supply stop when the machine is brought to a halt.

Performance and diagnostics

The powerful traction drive engine manages up to 10% gradients easily. The electronic diagnostics system caters for significant savings when it comes to servicing the machine.

8) Close to edge working

The protruding disc brushes and the self-aligning squeegee enable close to edge working. The brushes can take a mechanical pressure of up to 60 kg. The machine can be additionally equipped with hand-scrubbers and vacuum tools.

9) Compactly through the building

The complete technology and the comfort is constructed on minimal space. So the Scrubmaster B140 R fits through nearly all kinds of corridors and doors.

Hako: environmental- friendly right from the start

It is our legacy to leave behind a clean planet. That is why resources-, environmental- and climate protection characterizes each and every process at Hako which has been certified by independent institutions. Learn more about our on-going commitment at www.hako.com.

Everywhere and close by

Our efficient sales & service network guarantees close proximity and rapid help - worldwide.

Cleanliness combined with safety

Our machines meet the highest standards. Reliable quality "Made by Hako."

Buying, leasing, renting

We offer you many individual and attractive financing options.

We are available 24/7

Hako's spare part express and on-call service guarantees best possible availability.
